## Market Recap

Treasury yields edged lower once again in March, despite Fed officials holding the overnight rate steady for the second straight FOMC meeting. The overriding theme of the quarter was the Trump tariffs, more specifically the uncertainty fueled by the on-again/off-again series of threats aimed primarily at our neighbors to the north and south. Those threats became reality on March 3<sup>rd</sup> when a 25% tax was imposed on goods imported from Mexico and Canada, while an additional 10% tax was placed on Chinese imports, doubling the previously imposed 10%. Two days later, Trump decided that Mexican and Canadian goods falling under the USMCA agreement he himself negotiated five years ago would be exempt. The next day, a tariff on Canadian dairy products and lumber was announced, followed by a 25% tax on all steel and aluminum imported into the United States. This seemingly random pattern repeated itself throughout the month, shaking up consumer and business confidence. Trade partners quickly retaliated by levying new tariffs and increasing existing duties on U.S. goods. Perhaps more importantly, foreign countries scrambled to forge new agreements amongst themselves, reducing barriers to promote free trade.

Stocks experienced a particularly volatile month in which in the S&P 500 lost nearly 6%, despite corporate profits reaching an all-time high in the prior quarter. Initial concerns over tariff-related inflation increasingly morphed into recession fears. Extreme uncertainty has likely stalled business investment and consumer spending. Very few of the economic releases in March reflected the rapidly evolving tariff situation, which makes the data less useful as a predictor of future activity, although still helpful to establish a base. Overall, employment held up well, while inflation generally moved lower and consumer spending weakened.

Nonfarm payrolls for February were roughly in line with forecasts at an acceptable +151k, while the unemployment rate ticked up from 4.0% to 4.1%, *still very near historical lows*. Both the overall CPI index and core CPI were up +0.2% in February, *a tenth below the +0.3% median forecasts*. On a year-over-year basis, headline CPI declined from +3.0% to +2.8% and the core decreased to +3.1%, which although still too high, was *a four-year low*. High

visibility grocery prices were unchanged and prices at the gas pump were slightly lower. Headline retail sales, expected to bounce back from a weak January reading, rose just +0.2% in February, well below the +0.6% median forecast, while the previously reported January sales decline was revised even lower, from -0.9% to -1.2%. Weakness was widespread as 7 of 13 spending categories were lower.

Tariff concerns were more evident in the soft data releases as survey results were mostly terrible. The Conference Board's main consumer confidence gauge for March dropped 7.2 points to 92.9, while expectations for the next six months fell nearly 10 points to 65.2, *the lowest in 12 years and consistent with an economic downturn*. Pessimism about future business conditions and employment prospects sharply increased, with inflation expectations rising to 6.2% for the next 12 months. The University of Michigan consumer sentiment survey made headlines with long-term inflation expectations reaching a three-decade high.

The Fed, as expected, held rates steady at the March FOMC meeting. The updated summary of economic projections (the first since December) showed slightly higher inflation for 2025 and slightly lower GDP growth. The new dot plot continued to indicate two rate cuts in 2025, although with less conviction than in December. Powell's belief that tariff-related inflation would be temporary suggested that policymakers could cut sooner and more aggressively if the labor market and the economy weakened, even if inflation moved higher. . . as long as it was the tariffs that drove those price increases.

Although near-term recession is still unlikely, the Atlanta Fed's GDPNow measure for Q1 was -3.7% as of April 1<sup>st</sup>. In all likelihood, this will climb as the March economic numbers are tallied, but there's no denying the abrupt and seemingly severe Q1 slowdown. With few positive catalysts expected in the second quarter, especially if the global trade war worsens, the financial markets will continue bracing for weakness and lower rates.

## Investment Officers' Certification

This report is prepared for the City of Baytown (the "Entity") in accordance with Chapter 2256 of the Texas Public Funds Investment Act ("PFIA"). Section 2256.023(a) of the PFIA states that: "Not less than quarterly, the investment officer shall prepare and submit to the governing body of the entity a written report of the investment transactions for all funds covered by this chapter for the preceding reporting period." This report is signed by the Entity's investment officers and includes the disclosures required in the PFIA.

The investment portfolio complied with the PFIA and the Entity's approved Investment Policy and Strategy throughout the period. All investment transactions made in the portfolio during this period were made on behalf of the Entity and were made in full compliance with the PFIA and the approved Investment Policy.

## Disclosures & Disclaimers

As a courtesy to investors this information: (1) is provided for informational purposes only; (2) should not be construed as an offer to sell or a solicitation of an offer to buy any security; and (3) does not replace customer statements.

This report is designed to provide general information and is not intended to provide specific legal, investment, accounting, tax or other professional advice.

It is important to review and save all source documents provided by a product sponsor or brokerage firm which may contain notices, disclosures and other information important to you and may also serve as a reference. If conflicts between this report and sponsor reports or confirmations exist, the information provided by the product sponsors shall prevail. Fees and sales charges paid may not be reflected in the information.

The information and data contained herein is obtained from sources believed to be reliable but its accuracy or completeness is not guaranteed. Additionally, the information may contain assets held away from HTS, therefore investors should contact customer service or other representatives from the respective distributors or issuers to determine SIPC coverage for heldaway assets. HTS and HSAM do not guarantee the information contained herein or its accuracy or completeness regarding contributions, withdrawals, protected values. All information is subject to further review with client to validate final values.

It is not possible to directly invest in an index. Financial forecasts, rates of return, risk, inflation, and other assumptions may be used as the basis for illustrations. They should not be considered a guarantee of future performance or a guarantee of achieving overall financial objectives. Past performance is not a guarantee or a predictor of future results of either the indices or any particular investment. S&P rates the creditworthiness of individual bonds from: AAA highest to D lowest.

Investing in fixed income securities involves interest rate risk, credit risk, and inflation risk. Interest rate risk is the possibility that bond prices will decrease because of an interest rate increase. When interest rates rise, bond prices and the values of fixed income securities fall. When interest rates fall, bond prices and the values of fixed income securities rise. Credit risk is the risk that a company will not be able to pay its debts, including the interest on its bonds. Inflation risk is the possibility that the interest paid on an investment in bonds will be lower than the inflation rate, decreasing purchasing power.

Cash alternatives typically include money market securities and U.S. treasury bills. Investing in such cash alternatives involves inflation risk. In addition, investments in money market securities may involve credit risk and a risk of principal loss. Because money market securities are neither insured nor guaranteed by the Federal Deposit Insurance Corporation or any other government agency, there is no guarantee the value of your investment will be maintained at \$1.00 per share, and your shares, when sold, may be worth more or less than what you originally paid for them. U.S. Treasury bills are subject to market risk if sold prior to maturity. Market risk is the possibility that the value, when sold, might be less than the purchase price.

Investing in stock securities involves volatility risk, market risk, business risk, and industry risk. The prices of most stocks fluctuate. Volatility risk is the chance that the value of a stock will fall. Market risk is the chance that the prices of all stocks will fall due to conditions in the economic environment. Business risk is the chance that a specific company's stock will fall because of issues affecting it. Industry risk is the chance that a set of factors particular to an industry group will adversely affect stock prices within the industry.

Securities offered by HTS: (1) are not FDIC (Federal Deposit Insurance Corporation) insured; (2) are not bank deposits; (3) are not guaranteed by any bank or by any other federal government agency. None of the named entities are affiliates of HTS or HSAM. Hilltop Securities Asset Management (HSAM) is an SEC-registered investment advisor. Hilltop Securities Inc. (HTS) is a registered broker-dealer, registered investment adviser and municipal advisor firm that does not provide tax or legal advice. Member of FINRA & SIPC. HTS and HSAM are wholly owned subsidiaries of Hilltop Holdings, Inc. (NYSE: HTH) located at 717 N. Harwood St., Suite 3400, Dallas, Texas 75201, (214) 859-1800, 833-4HILLTOP.
